Phillip Brockman  
Director of Business Development, Eng.  
345 Springfield ST.  
Dayton, OH 45403

Dear Phillip,

I want to express my appreciation for Techmetals, Inc. effort on the development work on nickel plating of steel cylinders. You and your team were able to successfully develop a plating rig and prototype plated cylinders within the project scope timelines. I looked at the finished plated cylinders at Taylor-Wharton yesterday and they look great.

The working relationship between BOC and Techmetals, quality of the work, teamwork, and motivation to do the job right was excellent!

Please give my appreciation to the plating team for a job well done. By the way, I have been bragging about Techmetals' capabilities to my associates and cylinder package vendors. This follows your vision that... "TO BE SO GOOD, OUR CUSTOMERS BRAG ABOUT US!" Well done!

Yours Truly,

BOC (a Division of The Linde Group)
